June 17, 2010

Dear Chairman Van Wormer:

On November 18, 2009, Governor David A. Paterson signed into law the Child Passenger Protection Act or Chapter 496 of the Laws of 2009, referred to as "Leandra's Law". As you are aware, this important new law will help reduce drunken driving in New York State and promote traffic and community safety. "Leandra's Law" charged the NYS Division of Probation and Correctional Alternatives with the responsibility to promulgate regulations governing the monitoring of compliance by persons ordered to install and maintain ignition interlock devices on vehicles they own or operate. These regulations were promulgated as emergency regulations on April 23, 2010. Section 358.4 of these regulations requires that every County establish an ignition interlock program plan with respect to usage of ignition interlock devices and monitoring the compliance of an operator subject to installation of an ignition interlock device as directed by the sentencing court.

In order to facilitate this process, DPCA prepared a simple plan document, which was largely prescriptive in format to ease preparation and submission. DPCA has received your plan and very much appreciates its timely submission. We have carefully reviewed and hereby approve your plan. I would like to take this opportunity to compliment you on its thoroughness. Your plan indicates that Schoharie County will be well-positioned to implement the new law on August 15th.

DPCA looks forward to our continued work together as we implement this new public safety measure. Should you have any questions please feel free to call or e-mail Walter Cogswell at 518-485-5168 or Walter.Cogswell@dpca.state.ny.us.

Sincerely,

Robert M. Maccarone

4. Every plan shall establish that where an operator is under probation supervision, the department selects the specific class and features of the interlock device from a qualified manufacturer in its region. The operator may select the model of the ignition interlock device, meeting the specific class and features selected by the probation department from a qualified manufacturer in the operator's region of residence.

This plan establishes that where an operator is under probation supervision, the department selects the specific class and features of the interlock device from a qualified manufacturer in its region. The operator may select the model of the ignition interlock device, meeting the specific class and features selected by the probation department from a qualified manufacturer in the operator's region of residence.

5. Every plan shall establish that where an operator has received a sentence of conditional discharge, the monitor shall select the class of ignition interlock device available from a qualified manufacturer in its region for any such operator. The operator may select the model of the ignition interlock device from within the class designated by the monitor from a qualified manufacturer in the operator's region of residence.

This plan establishes that where an operator has received a sentence of conditional discharge, the monitor shall select the class of ignition interlock device available from a qualified

The equitable procedure should be based upon the proportion of ignition interlock devices paid to each qualified manufacturer by operators in the county/city.

Describe the procedure that the county/city will utilize to ensure the equitable distribution of waiver cases among manufacturers operating in the county/city. This will require coordination between the courts and monitors. The Probation Department monitor and Conditional Discharge monitor will maintain a record of all waiver cases and provide equal allocation of these cases to the vendors.
